

HYDROGEN IMPLEMENTING AGREEMENT

A briefing on Thursday, 10 June, 2:00-3:30

562 Dirksen Senate Office Building, Washington, DC USA

Global Hydrogen Landscape: Selected IEA HIA Member Programs and Initiatives

Hydrogen R,D&D is thriving worldwide. The International Energy Agency Hydrogen Implementing Agreement (IEA HIA) is the leading global collaboration for hydrogen R,D&D. IEA HIA Member programs, dedicated activities and initiatives reflect the rich diversity of competencies and strategic priorities of the IEA HIA Membership – including 21 nations, the Commission of the European Union and the United Nations Industrial Development Organization (UNIDO). These important efforts span the full range of topics in hydrogen R,D&D. Today's IEA HIA research will influence tomorrow's activities. As hydrogen energy gets closer to commercialization, the potential for impact becomes clearer: witness the May 16 announcement of a Memorandum of Understanding (MOU) between Germany and Japan on future cooperation in developing the hydrogen infrastructure, as well as mobile and stationary applications. What is happening today in IEA HIA hydrogen R,D&D? ***This briefing will feature presentations by several IEA HIA Members on their respective hydrogen programs and initiatives, including their fuel cell activities. Key aspects of the other IEA HIA member programs will be highlighted as well.***

Panelists

Dr. Aksel Mortensgaard, Director
Danish Partnership for Hydrogen and Fuel Cells
Denmark

Dr. Marc Steen
Joint Research Centre Institute for Energy
The Commission of the European Union

Dr. Yongsug Tak
Ministry of Knowledge Economy (MKE)
Republic of Korea

*The moderator will be Mary-Rose de Valladares, IEA HIA Manager.
Please contact her at +1 301 634 7423 for further information.*

This briefing will be held in cooperation with the National Hydrogen Association

Presentations from this event will be available on the IEA HIA website at:
